DETAILED ACTION

Election/Restrictions

Claims 1-10, 19 and 20 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 11-18, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 10/3/2005 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-20 allowed.

The following is an examiner's statement of reasons for allowance.

See the BPAI decision on 01/12/2009.

Art Unit: 2811

Prior art fails to teach or render obvious singularly or with combinations of elements as set forth in the claims a semiconductor device, including in particular, the limitation "wherein said first grid and said second grid are interconnected in a fabrication layer no later than a first metallization layer of said chip that accumulates a charge during a plasma process in a fabrication of said electronic chip, such that said first grid and said second grid do not accumulate an excessive differential voltage due to said plasma process" in claim 1 or the limitation "means for electrically interconnecting said first grid and said second grid no later than a first metallization layer that accumulates a charge during a plasma process in a fabrication of said chip" in claim 19.

Prior art fails to teach or render obvious singularly or with combinations of elements as set forth in the claims a method of fabricating a semiconductor device, including in particular, the limitation in claim 11 "interconnecting at least one grid of a design module of an electronic circuit formed on said chip with a corresponding grid in a second design module in a stage of fabrication of said chip such that a plasma processing of said fabrication does not cause a differential charge that damages a component of said chip"

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
